

MICROPUMPS

High-precision micropumps delivering up to 1000 bar, designed for compact and demanding applications. Ideal for research, aerospace, and portable systems requiring high performance in limited space.

Technical data

The components of the range :

- micro-pumps with fixed displacement from 7 to 1500 mm³,
- micro-pumps with variable displacement from 0 to 1500 mm³,
- pressure : 1000 bar.

Fields of application :

- oil research tools,
- oceanography, aeronautics,
- hand tools etc.
